

BeamForge is a work-in-progress cleanup of the VisiCut project, currently in development by [Oliver \(OctobYTE\)](#).

## Goals

- Improve the current UI
- Refactored source
- Multi-platform execution and compilation
- Easier configuration
- Stability
- Customisability
- +10 Awesome

## VisiCut

VisiCut and its settings have been somewhat bodge-fixed on Windows with UXStyle, and Mac OSX Lion+.

## Downloads

- [VisiCut 1.7 \(Working, Cross Platform\)](#)
- [VisiCut 1.7 Compatible Settings](#)
