Making a Vacuum Former! WOO!!! moar tooling

Project files here: [Google Drive Folder](#)

Project Aim

what the project is going to do, and what problem is it trying to fix

- *bullet points work well here*

Project Members

- [TBSliver](#)
- [Parag0n](#)

Hardware

Hardware components, specific parts needed

Schematic & Breadboard

picture of the schematic, and breadboard prototype. Can separate this section out if making multiple schematics or breadboard prototypes - could even make new pages

Prototypes

The various iterations of the hardware

Software

The software (if any) to run on the hardware/pc

Future Upgrades

Extra ideas or extra bits to add to the project once working
