

Team Documentation is a group who maintain the vast documentation stores that the hackspace has within its realm.

Basically, we look after this wiki, and our [Github](#) repository, while trying to make it as easy as possible for people to access, edit, and work with the documentation contained within. While it's not our purpose to write all the documentation for the hackspace (we're here to enable the members to do it), you'll occasionally see us racking up edits on the wiki or pushing code on the github repo.

We'd love for you to join our team, so feel free to pop over to our [Telegram Group](#), or message us on the main hackspace telegram group.
