Welcome to the home of the Team Woodwork, responsible for looking after, maintaining, and growing the [Woody Dusty](#) area, as well as training people up on our equipment!

This area is mainly for working with wood, and some plastics. We have a well-stocked workspace with plenty of tools and equipment, and provide training for any of the equipment that requires it.

We have a [Telegram Group](#) if you want to get involved!

Consumables

These are items that the hackspace classes as consumables, and we and Team Purchasing aim to keep in stock for our area. We have a small budget for this so we encourage donations, and have donation jars around the space.
