

Vinyl Cutter

This cutter is a PCUT CT630. Bob Bought it off eBay for £10, spares / repair.

Seems to work-ish in manual mode, but cant get it going at all in HPGL mode.

Broken Shit:

- Top Right of the carriage is cracked
- Right hand endstop is missing (not 100% needed - endstops just reset the machine)
- Wont talk to me on USB serial - Need to try hardware serial port.
