  - Primary Material: Wood
- 

## **\*\*Features\*\***

...

---

## **\*\*Training\*\***

This machine is included in the general WoodyDusty Training & Safety induction, this can be completed either in person or via the Moodle course:

insert link to Moodle course

The training will cover the following:

- Usage of the machine including workbench accessories
-

- How check & identify the router speed, size & height
  - How to change & replace the router bit
- 

## **\*\*Safety\*\***

When using the Router Table PPE is mandatory and the dust extraction should be running.

- Eye protection
- Ear protection
- Dust mask (recommended)

Loose clothing should be secured and loose jewelry should be removed, long hair must be tied back. Do not use gloves when operating the machine as they may become entangled.

During an emergency, if the workshop safety switches are triggered the machine will be disabled as power to the workshop will be stopped. Only board members have the ability to restore power to the workshops after these instances.

---

## **\*\*Risk Assessment\*\***
