- Drum Diameters = 13, 19, 26, 38, 51 & 76mm
 - Drum Length = 115mm
-

****Training****

These machines are included in the general WoodyDusty Training & Safety Induction, this can be completed either in person or via the Moodle course:

insert link to Moodle course

The training will cover the following:

- Usage of the machines including accessories used with the tool
- How check & identify the installed blade
- How to change & replace the blade
- How to trouble shoot issues with the machines

****Safety****

When using the mitre saws PPE is mandatory and the dust extraction should be connected and running.

- Eye protection
- Dust mask
- Hearing protection (recommended)
- **DO NOT** wear gloves

During an emergency, if the workshop safety switches are triggered the machine will be disabled as power to the workshop will be stopped.

****Risk Assessment****

[Sander Risk Assessment](#)

****Manuals****

- ~ *insert manuals* ~

****Maintenance****

Periodic maintenance is overseen by the Woodwork Team. Issues & faults can be reported to them though the public WoodyDusty telegram group chat [Got Wood?](#)
